

# High Line Rescue

&

**Warsaw Fire Department**

*Present*

## **Tower/Antenna Rescue Technician I**

**October 24 -28, 2011**

**Cost: \$425.00**

This Class is an introduction to the 1926.500-503 OSHA standards for fall protection. We will cover in detail the proper use and care of rescue, and fall protection equipment. The class will begin with a review of the 1926.500-503 OSHA standard for fall protection; also discussed in detail will be the OSHA approved equipment necessary to access the patient. The course will then proceed on to Climbing and Rescue scenarios. There will be a review of Fall Protection and Buddy Rescue Equipment, Anchoring, Knots, and Patient Packaging. We will then progress to scenarios designed to increase the student's knowledge and ability to deal with adverse situations. This class will be both physically and mentally demanding, so come prepared. Class size is limited to 18 students.

- Equipment Familiarization (hardware and software)
- Proper Use of OSHA & ANSI Mandated Equipment
- Knots
- Anchoring
- Building and Operation of Raising and Lowering Systems
- Patient Packaging

This course will begin with a classroom session at 8:00am on Monday, at 2204 E. Center St., Warsaw, IN; we will then move on to numerous hands on evolutions. The only equipment you need to bring is a tight fitting pair of leather work gloves, work boots, and a helmet. No bunker gear, and structural fire fighting helmets get heavy when doing high angle scenarios. This class will proceed regardless of the temperature, so dress accordingly. If you have questions please feel free to call me at (765) 412-4371.
